The IP65-rated iESPRITE® combines our latest protection technology with the highly desired ESPRITE® maintaining identical output and feature-rich effects in a fully protected package capable of handling all the challenges of outdoor environments.

Joining the Robe iSeries iESPRITE® again negates the traditional weight penalty associated with IP-rated fixtures having similar weight to the indoor ESPRITE®. With class-leading form factor, size and appearance, and all the features and identical performance of the indoor original, iESPRITE® once again enables seamless integration between models, even on the same truss if desired!

The ingenious ingress protection system has been specifically designed to allow standard maintenance and preparation procedures, such as TRANSFERABLE ENGINE exchange and gobo replacement, without any additional tools, as gobo changes or maintenance work can be done on-site. The onboard patented RAINS™ (Robe Automatic Ingress Neutralization System) manages humidity, temperature and pressure control using an active monitoring system that automatically removes any moisture detected within the fixture and provides constant monitoring to ensure peak performance.

iESPRITE® runs an ingenious Self Pressure Test to check internal pressure. This self-test, taking less than 3 minutes, provides an error message if gaskets and covers were not replaced correctly or locking screws were incorrectly tightened, ensuring maximum protection.

Their lightweight magnesium alloy covers, with aluminium alloy substructure, provide a dust-free environment for the optics. This eliminates the need for frequent cleaning, routine maintenance, and UV damage to plastic parts. To maintain consistently high lumen output, even with the rigours of outdoor performance, water, dirt, dust, haze, and smoke are repelled from the front lens with our unique parCoat™ hydrophobic, oleophobic-resistant coating. Furthermore, it allows easy removal of deposits without scratching or damage.

By including NFC (Near-Field Communication) technology, you can access setup, diagnostic and performance features, even when the fixture is not powered directly from your mobile device using the Robe Com app.

Outdoor fixtures need to operate in extreme cold. iESPRITE® contains an innovative POLAR+™ technology - a special standby mode with low power consumption, in which the fixture's sensors and communications channels continue to function. When activated, POLAR+™ automatically maintains an internal temperature level, giving instant operability down to minus 50 degrees centigrade!

iESPRITE® is available with a choice of patented IP65-rated iSE-TE™ 650W White LED TRANSFERABLE ENGINES; HP (High Performance) 6.700 K, 34.000 lm CRI70; HCF (High Colour Fidelity) 6.000 K, 22.800 lm CRI 96.

The identical 9:1 zoom optical system, with a 5.5° to 50° zoom range, provides all the flexibility you need. Our cutting-edge CMY colour mixing system provides beautifully smooth mixing and transitions. Combined with two colour wheels, CRI 80 and 90 filters (HP Engine), and a variable CTO from 3.000 - 6.700 K give iESPRITE® total colour finesse. With the patented Plano4™ four individual plane framing shutters; one rotating fully indexable and one static gobo wheel; an animation wheel; a 6-facet bi-directional variable speed prism and two MagFrost™ 1° and 5° frosts, you have all the creative tools you need. Removing the need for distracting pre-use pan and tilt calibration movement, our patented MAPS™ (Motionless Absolute Positioning System) allows the fixture to fully calibrate while remaining static. Very useful when located within confined spaces.

For those requiring maintained network connectivity, we have Epass™ available as standard. Our REAP™ (Robe Ethernet Access Portal) allows access to fixture information and diagnostics over Ethernet Networks. Perfect for installations requiring remote centralised monitoring of fixture performance. Important for television users, Cpulse™ provides flicker-free management of the latest camera systems, and ChromaTint™ for direct green/magenta content control.

iESPRITE® is fully compatible with our industry-leading RoboSpot™ remote-controlled follow-spot system.

**iESPRITE® - Robe reliability in all weathers.**
